# Biochemistry Colloquium

Feb 4, 2026, 15:00

## Anna Maria Papini

University of Florence, Dipartimento di Chimica „Ugo Schiff“

### From Lab to Market:

### Peptide Innovations for Health, Beauty, and Well-Being within the EUniWell Alliance

Anna Maria is a bioorganic chemist skilled in peptide science and focused on chemical biology. Peptides 4 Wellness is built on the idea that peptides are highly versatile tools for innovation. With the right infrastructure for peptide design and synthesis, young researchers can develop their ideas, overcome technological challenges, and translate concepts into applications. This vision is shaped by personal experience: after returning from Germany following part of a PhD, the need to build such an infrastructure from scratch became clear. Over time, work at the University of Florence and collaboration with students, postdocs, and early-career researchers from across Europe highlighted how essential this environment is for enabling innovation.

**When:** Wed, Feb 4, 2026  
at 15:00 PM

**Where:** Institute for Biochemistry  
Building 300  
Zülpicher Str. 47  
Room 170

**Host:** Ines Neundorf  
[ines.neundorf@uni-koeln.de](mailto:ines.neundorf@uni-koeln.de)
